

2024/2025 Idaho Noxious Weed Control Association Scholarship Impact Report

The scholarship recipients for this year include Macy Smith and Beau Hansen.

Macy Smith is a junior from Grangeville and is majoring in agriculture economics and minoring in soil science and crop management with certificates in agricultural commodity risk management and precision agriculture. She completed a summer internship in 2024 with Valley Agronomics in Greenleaf. This summer she has secured an internship with AgWest Farm Credit. “I am really thankful for the Idaho Weed Control Association Scholarship as it helped me pay my tuition fees this year and inspired me to put forth my best efforts in all of my endeavors. I am thankful for your helping me in pursuing my education and look forward to giving back to future generations of Idahoans in any and all ways possible. I am not exactly sure what I will pursue after graduating in May of 2026, but I am actively seeking exposure to industries and opportunities that interest me.”

Beau Hansen is a junior from Blackfoot and is majoring in crop science. He is still seeking a summer internship for 2025 and after graduating he would like to take the knowledge that he has obtained and bring it back to his home community in an agricultural job as a field rep or agronomist. He shared that this scholarship has helped him significantly in his studies and is grateful for the generosity of the Idaho Noxious Weed Control Association.

2024/2025 Distribution Amount: \$1,524

2024 Market Value: \$40,661.82
